**Objectives and Investment Policy**

**Objective:** Seeks to increase the value of your investment and to provide income over the recommended holding period.

**Portfolio securities:** The Sub-Fund invests mainly in below-investment grade bonds from anywhere in the world, including emerging markets. The Sub-Fund may also invest in money market securities, and may invest up to 20% of its assets in convertible securities and, on an ancillary basis, equities. The Sub-Fund's investments will mainly be denominated in euro. For temporary defensive purposes, the Sub-Fund may invest up to 49% of its assets in cash or in bonds from EU states whose national currency is the euro. The Sub-Fund may invest up to 10% of its assets in contingent convertible bonds. The Sub-Fund may use derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure to various assets, markets or income streams.

**Risk and Reward Profile**

Lower Risk (not-risk free)  
Lower Potential Reward

Higher Risk  
Higher Potential Reward

**What does this risk indicator mean?**

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. The Sub-Fund's risk category reflects the fact that as an asset class, below-investment grade bonds tend to be more volatile than investment grade bonds. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.

**Additional key risks:**

- The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:**
- Counterparty risk:** Contract parties may default on their obligations under derivatives contracts entered into with the Sub-Fund.
- Credit risk:** The issuers of bonds held by the Sub-Fund may fail to pay principal or interest due. Higher yielding bonds may carry greater credit risk.
- Liquidity risk:** In adverse market conditions, securities that are liquid may become difficult to value, buy or sell, which could affect the Sub-Fund's ability to process redemption requests.
- Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.
- Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
- Emerging market risk:** Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.
