Objectives and Investment Policy

Objective: Seeks to increase the value of your investment and to provide income over the medium to long term.
Portfolio securities: The Sub-Fund invests mainly in below-investment grade bonds from anywhere in the world, including emerging markets, in particular euro denominated bonds, as well as cash and money market instruments. The Sub-Fund may invest up to 90% of its assets in below-investment grade bonds and up to 20% in bonds rated below CCC by Standard & Poor or considered to be of comparable quality by the Management Company. The Sub-Fund may also invest in convertible bonds and, on an ancillary basis, in equities. The Sub-Fund may invest up to 10% of its assets in contingent convertible bonds. The Sub-Fund may use derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure to various assets, markets or income streams.

Risk and Reward Profile

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is consistent with the risk limits set for the Sub-Fund. Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. The Sub-Fund's risk category reflects the risk profile of the mix of asset classes in which it invests. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.

Additional key risks:

- The risk indicator may not adequately capture the following additional key risks of the Sub-Fund:
- Counterparty risk:** Contract parties may default on their obligations under derivatives contracts entered into with the Sub-Fund.
- Credit risk:** The issuers of bonds held by the Sub-Fund may fail to pay principal or interest due. Higher yielding bonds may carry greater credit risk.
- Liquidity risk:** In adverse market conditions, securities that are liquid may become difficult to value, buy or sell, which could affect the Sub-Fund's ability to process redemption requests.
- Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.
- Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
- Emerging market risk:** Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.
