Objectives and Investment Policy

Objective: Seeks to increase the value of your investment over the medium to long term.

Portfolio securities: The Sub-Fund mainly invests in derivatives whose value is linked to various UBS and other commodity market indices. The indices are provided by financial institutions specialised in commodity futures indices. The Sub-Fund will expose at least two-thirds of its assets to the performance of two or more commodity market indices. The Sub-Fund may also invest in bonds, convertible bonds, bonds with attached warrants, other fixed interest securities, zero-coupon bonds and money market securities. Further information relating to the indices used is provided in the Prospectus. The Sub-Fund may also use derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (either long or short) to various assets, markets or income streams.
