Objectives and Investment Policy

Objective: Seeks to increase the value of your investment and to provide income over the recommended holding period.

Portfolio securities: The Sub-Fund invests mainly in corporate bonds from emerging markets that are denominated in U.S. dollars or other OECD currencies or where their credit risk is linked to emerging markets. The Sub-Fund may also invest up to 25% of its assets in bonds with attached warrants as well as up to 5% in equities. The overall currency exposure to emerging markets may not exceed 25% of the Sub-Fund's assets. The Sub-Fund may invest up to 10% of its assets in contingent convertible bonds. The Sub-Fund may use derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure to various assets, markets or income streams.

Meet the Team

Yerlan Syzdykov

Tracking Error	1.14%	1.95%	2.35%
Information Ratio	2.45	1.14	0.72

Risk and Reward Profile

Lower Risk (not-risk free)
Lower Potential Reward

Higher Risk
Higher Potential Reward

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. The Sub-Fund's risk category reflects the fact that as an asset class, emerging market bonds tend to be more volatile than developed market bonds. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.

Additional key risks:

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

Counterparty risk: Contract parties may default on their obligations under derivatives contracts entered into with the Sub-Fund.

Credit risk: The issuers of bonds held by the Sub-Fund may fail to pay principal or interest due. Higher yielding bonds may carry greater credit risk.

Liquidity risk: In adverse market conditions, securities that are liquid may become difficult to value, buy or sell, which could affect the Sub-Fund's ability to process redemption requests.

Operational risk: Losses may occur due to human error or omission, process errors, system disruptions or external events.

Derivatives risk: Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.

Emerging market risk: Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

Average Credit Quality	BB-	BB+

▲Credit Rating data and Average Credit Quality calculations use an average of available ratings across S&P, Moodys and Fitch. In the case of sovereign bonds that are not rated by any of the 3 referenced rating agencies, an average of the issuer rating is used. Non sovereign bonds that are not rated by any of the 3 referenced rating agencies are excluded from the Average Credit Quality calculation.

Credit Rating data reflects the exposure of credit derivatives.
