Objectives and Investment Policy

Objective: Seeks to increase the value of your investment and to provide income over the recommended holding period.

Portfolio securities: The Sub-Fund invests mainly in euro denominated investment grade corporate bonds. The Sub-Fund may also invest in bonds from emerging market issuers and, on an ancillary basis, in government bonds. The Sub-Fund may invest up to 10% of its assets in contingent convertible bonds. The Sub-Fund makes extensive use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (either long or short) to various assets, markets or income streams. This may generate a high level of leverage. In particular, the Sub-Fund may invest in short and medium-term interest rate swaps.

Risk and Reward Profile

Lower Risk (not-risk free)
Lower Potential Reward

Higher Risk
Higher Potential Reward

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. The Sub-Fund's risk category reflects the fact that as an asset class, investment grade bonds tend to be less volatile than below-investment grade bonds. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.

Additional key risks:

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

Counterparty risk: Contract parties may default on their obligations under derivatives contracts entered into with the Sub-Fund.

Credit risk: The issuers of bonds held by the Sub-Fund may fail to pay principal or interest due.

Liquidity risk: In adverse market conditions, securities that are liquid may become difficult to value, buy or sell, which could affect the Sub-Fund's ability to process redemption requests.

Operational risk: Losses may occur due to human error or omission, process errors, system disruptions or external events.

Derivatives risk: Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
