\* Expected income target in 2018 in Euro for Class A USD Distributing Quarterly of this Sub-Fund, gross of fees. Income can be exceeded or undershot and should not be construed as an assurance or guarantee.

The target income and previous years' actual income refers to Class A USD Distributing Quarterly of this Sub-Fund. Other Unit classes may have a different target and may have achieved different level of income due to launch date or currency impact. The term Distribution refers to the income paid in any particular year. Treatment for tax purposes may vary depending on the jurisdiction. Please consult your tax adviser in order to understand any applicable tax consequences.

**Objectives and Investment Policy**

**Objective:** Seeks to provide income and, secondarily, to increase the value of your investment over the recommended holding period.

**Portfolio securities:** The Sub-Fund invests mainly in a broad range of equities of companies from anywhere in the world. The Sub-Fund may invest up to 20% of its assets in bonds. The Sub-Fund may use derivatives to reduce various risks, for efficient portfolio management or as a way to gain exposure to various assets, markets or income streams. In particular, the Sub-Fund uses options to generate additional income.

**Risk and Reward Profile**

Lower Risk (not-risk free)  
Lower Potential Reward

Higher Risk  
Higher Potential Reward

**What does this risk indicator mean?**

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. The Sub-Fund's risk category reflects the fact that as an asset class, equities tend to be more volatile than money market securities or bonds. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.

**Additional key risks:**

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

**Counterparty risk:** Contract parties may default on their obligations under derivatives contracts entered into with the Sub-Fund.

**Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.

**Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
