**Objectives and Investment Policy**

**Objective:** Seeks to provide a high level of current income over the recommended holding period.

**Portfolio securities:** The Sub-Fund invests at least 80% of its assets in bonds, including mortgage-related and asset-backed securities. These investments may be from anywhere in the world, including emerging markets, and may be denominated in any currency. The Sub-Fund may invest up to 70% of its assets in below-investment grade bonds, up to 20% in bonds rated below CCC by Standard & Poor or considered to be of comparable quality by the Management Company, up to 30% in convertible securities and, on an ancillary basis, in equities. The Sub-Fund may use derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure to various assets, markets or income streams.

**Calendar Year Returns**

▲ Performance data provided refers to Class A Euro Non-Distributing Hedged only, and is based upon NAV net of fees. For details of other Unit Classes available, please refer to the prospectus. There are costs associated with hedging which means that the return on a Euro Hedged Unit Class is likely to be lower than the US Dollar Unit Class in the same Sub-Fund. This document should be read in conjunction with the country specific material which is separately available. Benchmark performance is stated in US Dollar.

**Risk and Reward Profile**

Lower Risk (not-risk free)  
Lower Potential Reward

Higher Risk  
Higher Potential Reward

**What does this risk indicator mean?**

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. The Sub-Fund's risk category reflects the risk profile of the mix of asset classes in which it invests.

**Additional key risks:**

- The risk indicator** reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:
- Counterparty risk:** Contract parties may default on their obligations under derivatives contracts entered into with the Sub-Fund.
- Credit risk:** The issuers of bonds held by the Sub-Fund may fail to pay principal or interest due. Higher yielding bonds may carry greater credit risk.
- Liquidity risk:** In adverse market conditions, securities that are liquid may become difficult to value, buy or sell, which could affect the Sub-Fund's ability to process redemption requests.
- Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.
- Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
- Emerging market risk:** Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.
