Objectives and Investment Policy

Objective: Seeks to increase the value of your investment over the recommended holding period.

Portfolio securities: The Sub-Fund invests mainly in a broad range of equities of companies that are based in, or do most of their business in, developing European countries, as well as countries in and around the Mediterranean basin, some of which may be considered as emerging markets. The Sub-Fund may use derivatives to reduce various risks or for efficient portfolio management.

Risk and Reward ProfileLower Risk (not-risk free)
Lower Potential RewardHigher Risk
Higher Potential Reward**What does this risk indicator mean?**

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. The Sub-Fund's risk category reflects the fact that as an asset class, equities tend to be more volatile than money market securities or bonds. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.

Additional key risks:

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

Liquidity risk: In adverse market conditions, securities that are liquid may become difficult to value, buy or sell, which could affect the Sub-Fund's ability to process redemption requests.

Operational risk: Losses may occur due to human error or omission, process errors, system disruptions or external events.

Derivatives risk: Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.

Emerging market risk: Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.
